

Comegal

Machining of parts and
special tools

Shearing die

History

We entered the machining industry in 1998. In 2002 we became part of the Precisgal Group, completely changing our business philosophy. We have developed with the market, diversifying our production and modernising our processes and range of machine tools.

Stamping

Quality

ISO 9001 certified, our quality policy is based on continuous improvement. Planning and monitoring production is crucial, which is why we use ERP software.

Working with our customers and suppliers also ensures the quality of the final product. Our people are our main resource, they bring knowledge, experience, youth and commitment to the business.

Industries

Our production in Comegal goes mainly to the automotive industry, but as a multi-industry business we also work in a variety of other industries such as telecommunications, engineering and metal packaging.
