Development of automation systems,
traceability, programming and robotics

Palletiser

History

We started in 1990 with a clear business vision focused on robotics and automation. In 2014, we joined the Precisgal Group, strengthening its value chain and renewing our business philosophy.

We are now a leading business in the installation and operation of industry 4.0 solutions.

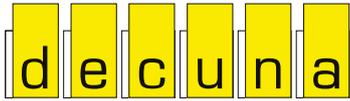

Control cabinet

Quality

Quality is a key focus for us and we are ISO 9001 certified.

Planning and traceability are essential, which is why we use ERP software that integrates all departments and processes in the business.

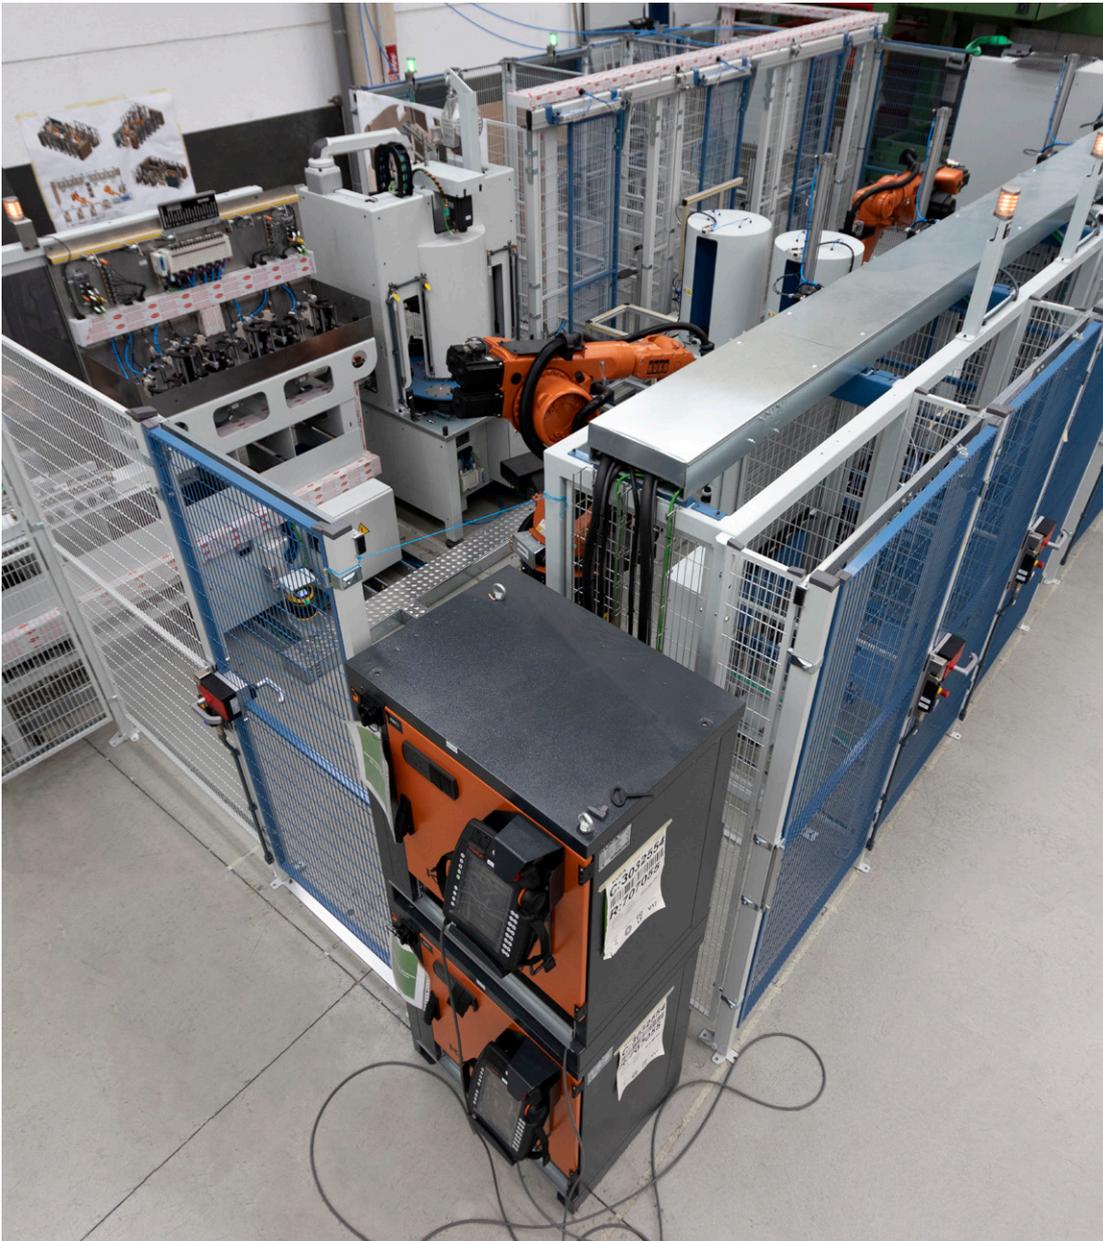

Due to the nature of our products, working very closely with customers and suppliers is essential to ensure product quality. Decuna's people and their proactive approach are the key to our success. Their professional expertise, know-how, experience and commitment are outstanding.

Industries

Our product range is very broad because each installation is bespoke and responds to the needs of each individual customer. As a result, we have extensive experience in many industries such as automotive, aeronautics, communications, metal packaging, banking, etc.

Automated tool warehouse

Operator station managed through traceability

Products

Our production is focused on the installation and operation of industrial automation, robotics, traceability, artificial vision, off-line programming, simulation, etc. through solutions adapted to industrial processes.
