INTEGRATED ENGINEERING

Design, construction, set-up and commissioning of
production lines and specialised machines

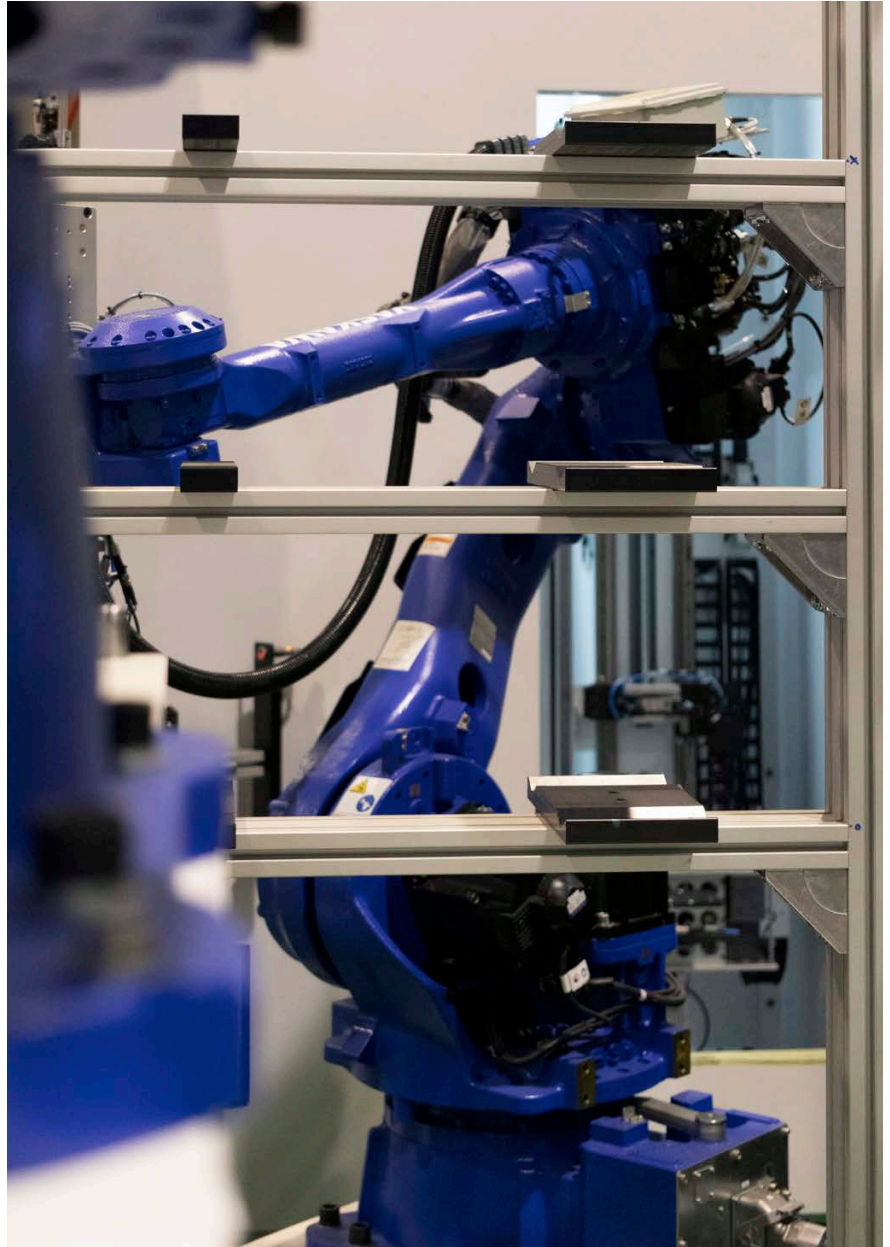

Gantry

History

The business started in 1988, offering industrial solutions tailored to customers' needs with industrial turnkey projects, from design to commissioning. We are a global company, exporting almost 100% of our production across the five continents.

Automated artificial vision line

Quality

Quality is a key element in our success and we are ISO 9001 certified. Planning and traceability are essential, so we use ERP software that integrates all departments and processes in the business.

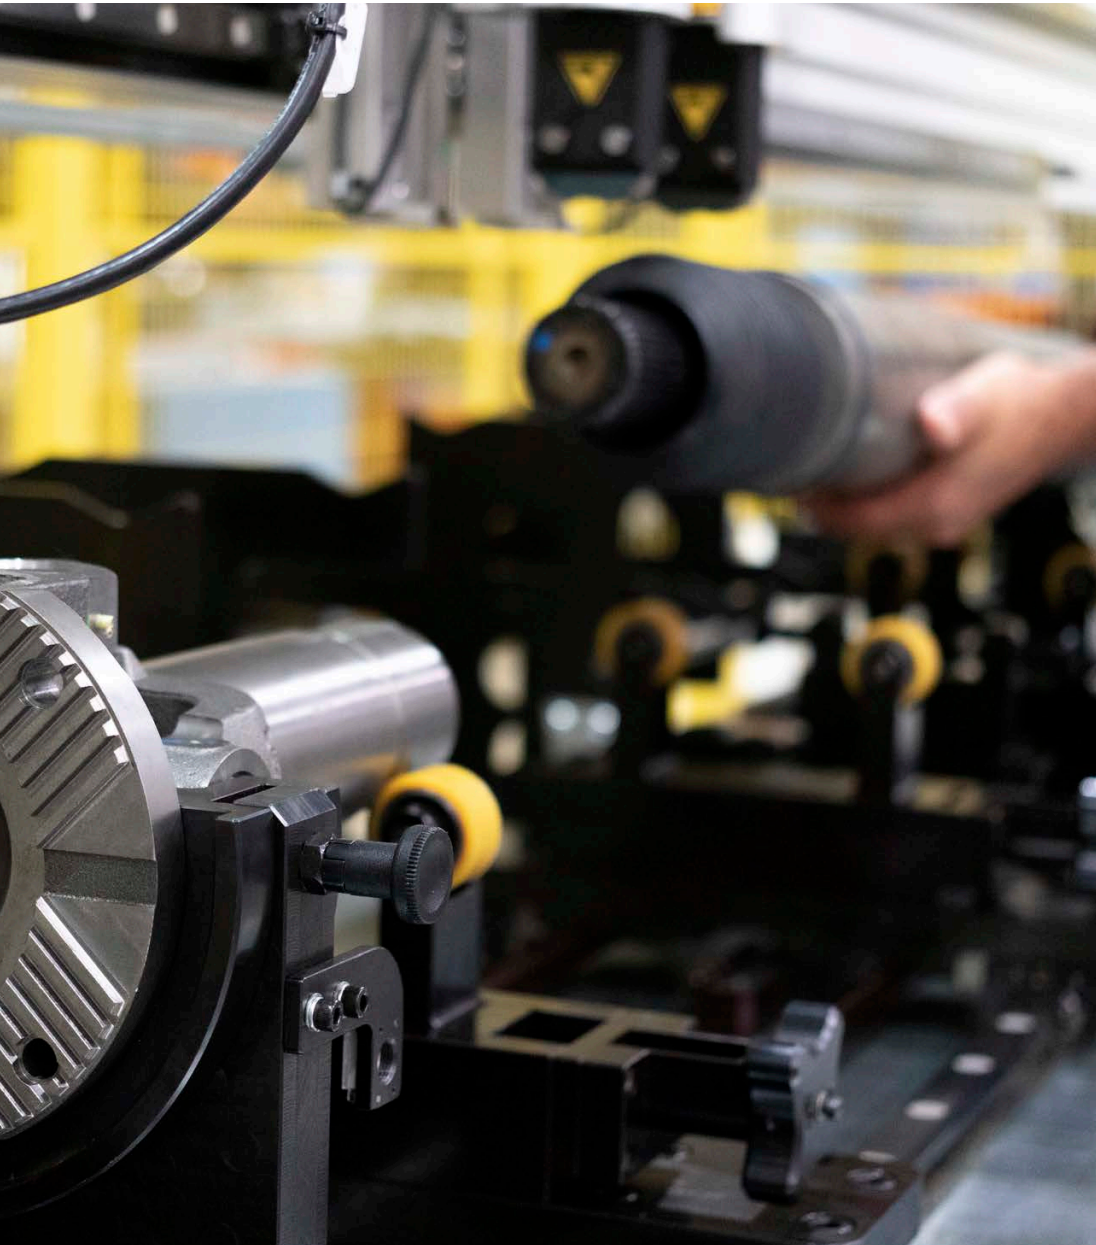

Due to the nature of our products, working very closely with customers and suppliers is essential to ensure product quality.

Our highly effective people are another key component to our success. Their professional expertise, know-how, experience and commitment are outstanding.

Industries

Mecanizados Atlántida mainly works with the automotive industry, however we offer and install solutions in a variety of other industries such as communications, metal packaging, etc.

Propshaft assembly machine

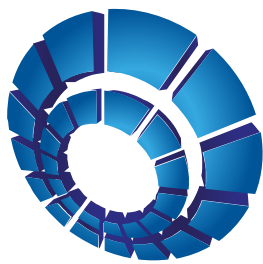

Cutting press

Products

We offer comprehensive automated equipment solutions to industry. Our production is focused on the design, construction, assembly, set-up and commissioning of capital equipment, production lines and specialised machines, all tailored to the customer's needs.
